## 11 DAY KIMBERLEY CRUISE FROM BROOME TO BROOME

### Day 1: We Welcome You Aboard MV REEF PRINCE in Broome

Our Cruise Director will greet you aboard our Broome charter bus at your accommodation. We arrive at Gantheaume Beach for the first of many trips in the tenders. We'll ferry you out to your home for the next 8 days – MV Reef Prince.

On board you can enjoy morning tea meet your crew and be introduced into your cabin. We'll be steaming North on our Broome cruise as soon as possible.

You can enjoy the sea air and views from the decks, spot for whales, turtles and dolphins, explore the boat or have a nap as we cruise north up the Dampier Peninsula.

### Day 3: Hanover Beach, Camden Harbour & Cruise into St George Basin.

From Sampson Inlet we'll cruise through the pearling operation of Kuri bay, Australia's first attempt at Cultured Pearls. In 1957 a poor season of Pearl farming in Japan resulted in an estimated 17 tonnes of pearls being lost. Following this a joint Australian, American and Japanese effort established Kuri Bay Pearls, now very successful venture culturing *Pinctata Maxima*.

In 1864, an association of optimistic farmers and workers attempted to establish a new settlement within Camden Harbour. With the tides on our side we may be able to visit this ill-fated site and relive the little known history of this area.

Hanover Beach is next for a little Kimberley dip and stretch our legs. From Hanover we cruise through the picturesque Munster Waters on our way into the St George Basin. Standing tall on our arrival will be Mt Trafalgar and Mt Waterloo, Named by P. P. King in 1820 after the recent Napoleonic wars.

### Day 2: Welcome to the Buccaneer Archipelago

Relax, sit back and enjoy the scenery as we cruise throughout the magnificent Buccaneer Archipelago. The Buccaneer Archipelago consists of more than 800 islands, this area undergoes a tidal range of over 10 metre. Named by Phillip Parker King in 1820 in memory of William Dampier, the 18th century English explorer.

We'll visit Silica Beach for a scenic beach walk then onto Crocodile Creek. We'll cruise up the creek in our Tenders and view a lovely spring fed waterfall. For some a climb to the top of the falls reveals a safe swimming hole fringed by Pandanus. Then into beautiful Myridi Bay to enjoy a scrumptious lunch.

Enjoy our second sun set, tonight over Montgomery Reef as we cruise towards Sampson inlet. A chance to spot whales and dolphins at play and perhaps catch a fresh fish for dinner.

Located at the top end of Collier Bay, Sampson makes a perfect natural harbour for our evening stop. We might even find a few very tasty large Kimberley black lipped oysters in Sampson. Perhaps some Aboriginal art or the fishermen might like to drift a bait for a Spanish Mackerel on the high tide.

### Day 4: Prince Regent River including King's Cascade

With the tides and time on our side we'll have an unforgettable morning arrival within the Prince Regent River. We will take you to view the lovely King's Cascade where we'll remind you to respect the local crocs and their environment. If the tides are on fair we may be able to show you some easily accessible Aboriginal art or the spectacular Cathedral Falls. The more adventurous can climb to the top of Kings Cascade. The breathtaking scenery will have your camera working overtime. Leaving the Prince Regent River on the falling tide we will cruise to a safe anchorage for another magic Kimberley sunset at Porosus Creek.

## ITINERARY

### Day 5: Explore Porosus Creek and Hunter River

An early start today to enjoy the sunrise over the towering cliffs of Porosus. The abundant Kimberley wildlife within these waters is driven by the thick mangroves. Don't forget your camera on today's morning expedition. Some may like to bring a fishing rod to a flick for a Barra in the run offs. Some great fishing to be had in these waters this afternoon. We'll leave this serene area as the sun sets, making our way to a historic site where a young English navigator beached his boat for repairs.

### Day 6: Careening Bay – Historic European Site.

Today we admire the work of an early European explorer P.P. King. King explored and chartered the Kimberley in 1820-22. His detailed and accurate charts form the basis of our modern electronic plotters, allowing us to safely cruise these waters. Unfortunately, his early exploits didn't come without problems as we'll discover. Careening Bay was named by Phillip Parker King after his ship, 'HMC Mermaid', was careened during his first voyage of discovery in the Kimberley. Our crew will lead you to the site of a large boab tree bearing the inscription "HMC Mermaid – 1820", still clearly visible almost 200 years later. This evening we cruise to our favourite Kimberley beach. Hanover beach, where an early explorer Lt Grey set out to discover the great inland sea.

### Day 7: Hanover Beach Art, Fishing & Beach Walk.

After a healthy breakfast we explore our favourite Kimberley beach – Hanover. These perfect sands will massage your feet. The cool waters will tempt you for a safe dip. The local birds will call their morning song. And our cruise director might even play his favourite Didgeridoo in an ancient cave surrounded by rock art. This afternoon we ride the tide into the evening to Collier bay.

### Day 8: South into Collier Bay & Montgomery Reef.

Up early to make the most of the incoming tide to take us down into Collier Bay. Our aim today is to begin our exploration of Doubtful Bay and the Sale River or Ruby Falls.

On the low tide, we enjoy a fascinating reef exploration of the 400 sq km's of Montgomery Reef. With one of the biggest tide ranges in the world, on a high spring tide this reef is more than 4 meters underwater, then within 6 hours on low tide it's exposed by more than 4 meters. A marvel not to be missed

### Day 9: Sale River & Talbot Bay for the evening.

On the rising tide we take an unforgettable passage up the Sale River. On the high tide we'll hop in our tenders and zip up to where the fresh water from the Sale River meets the tidal salt water. We'll enjoy some heavenly country and the crystal waters of the rainforest creeks feeding the Sale. Time to leave this awesome country. We cruise back out of the magnificent Sale River on our way to Talbot Bay and the Horizontal Falls.

### Day 10: Talbot Bay including the amazing Geology of Cyclone Creek and the Horizontal Falls

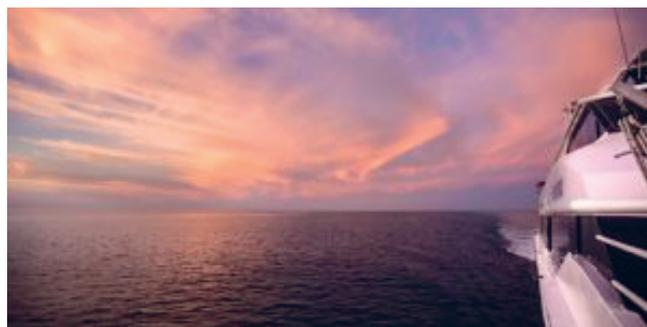

Today we'll experience the awesome power of the Horizontal Falls on high tide. When it's safe your crew will take you through the falls then continue on for a magnificent exploration of the geology located within Talbot Bay. About 1800 million years ago a piece of continental crust, which we now know as the Kimberley, impacted with Northern Australia. A succession of intrusive lava flows together with massive up lifting and faulting of the once horizontal layers of sandstone have given rise to the amazing display of geology we can now enjoy in Talbot Bay and the rest of the Yampi Peninsula. This afternoon we'll cruise from Talbot Bay past Koolan Island, where you can view the heavily mined iron ore islands. We'll enjoy our final perfect Kimberley sunset and perhaps a glass of your favourite from Silica Beach. Departing the Buccaneer Archipelago we cruise through the night to have you back in Broome.

### Visitors Pass (North Kimberley Region) - Wunambal Gaambera Country

The traditional indigenous owners of the Wunambal Gaambera Country of the North Kimberley Region and their representatives have recently introduced a 'Visitor's Pass' for all guests entering their lands.

As you may be aware there has been many discussions with the Aboriginal Corporations regarding the Visitor's Pass (VP). A visitor pass is now required for all passengers to access areas and visit the natural and cultural assets of the Wunambal Gaambera Country of the North Kimberley Area.

This Visitor Pass fee for 2020 is included in our cruise fares.

### Day 11: To Broome

A hearty breakfast to start the day as we continue our cruise back to Broome. Sit back and reflect on the last 11 days of your unforgettable Kimberley expedition as we steam south. Now is the time to swap your details with the crew and your friends aboard the Reef prince. We should arrive in the mid-morning at Gantheaume Bay where you will be ferried ashore and transferred to your accommodation.

**Please note: This itinerary is subject to change. The skipper will customize your cruise depending on weather and tidal conditions. To undertake some of the shore based excursions you will need to have a moderate level of fitness. You are however, quite welcome to enjoy the views from the vessel without going ashore. It's your cruise so you can do as little or as much as you would like.**
